What Makes Our Vials So Different?

From start to finish, Verex™ vial and cap products are manufactured to provide high quality, state-of-the-art solutions for your most challenging, sensitive applications.

Our innovative, precision products offer compatibility with virtually any autosampler and provide air-tight, leak-free seals to safely store and transfer your most important samples.

Certified

The highest quality materials combine with tightly controlled manufacturing processes to produce uniform, trouble-free products you can rely on.

100% Defect-Free

No product is placed into inventory without passing cleanliness and performance testing for consistent results.

Made with High Quality Glass

Verex offers the lowest ion content possible to reduce sample loss and contamination. 33-Expansion clear glass (USP Type 1 borosilicate, Class A) and 51A-Expansion amber glass (USP Type 1 borosilicate, Class B).

We Guarantee Performance

We want you to be as confident in our products as we are. Verex certified sample vials, inserts, caps, and seals are guaranteed to ensure problem-free, reproducible performance you can trust – all at competitive prices.

BE-HAPPYTM
guarantee

Your happiness is our mission. Take 45 days to try our products. If you are not happy, we'll make it right.

www.phenomenex.com/behappy

Make the Switch to Verex!

Finding the Verex replacement to your current vials and caps is EASY. Use our online web tool to find the guaranteed Verex product match.

2 Easy Steps:

1. Enter your current vial or cap part number
2. Order the recommended Verex part number

www.phenomenex.com/VialFinder

Certified Vial Products Redefined

All Verex products are fully lot-tested and certified, ensuring optimum performance for your application. Each product comes with a Certificate of Conformance. Learn more about product specifications and testing at www.phenomenex.com/Verex

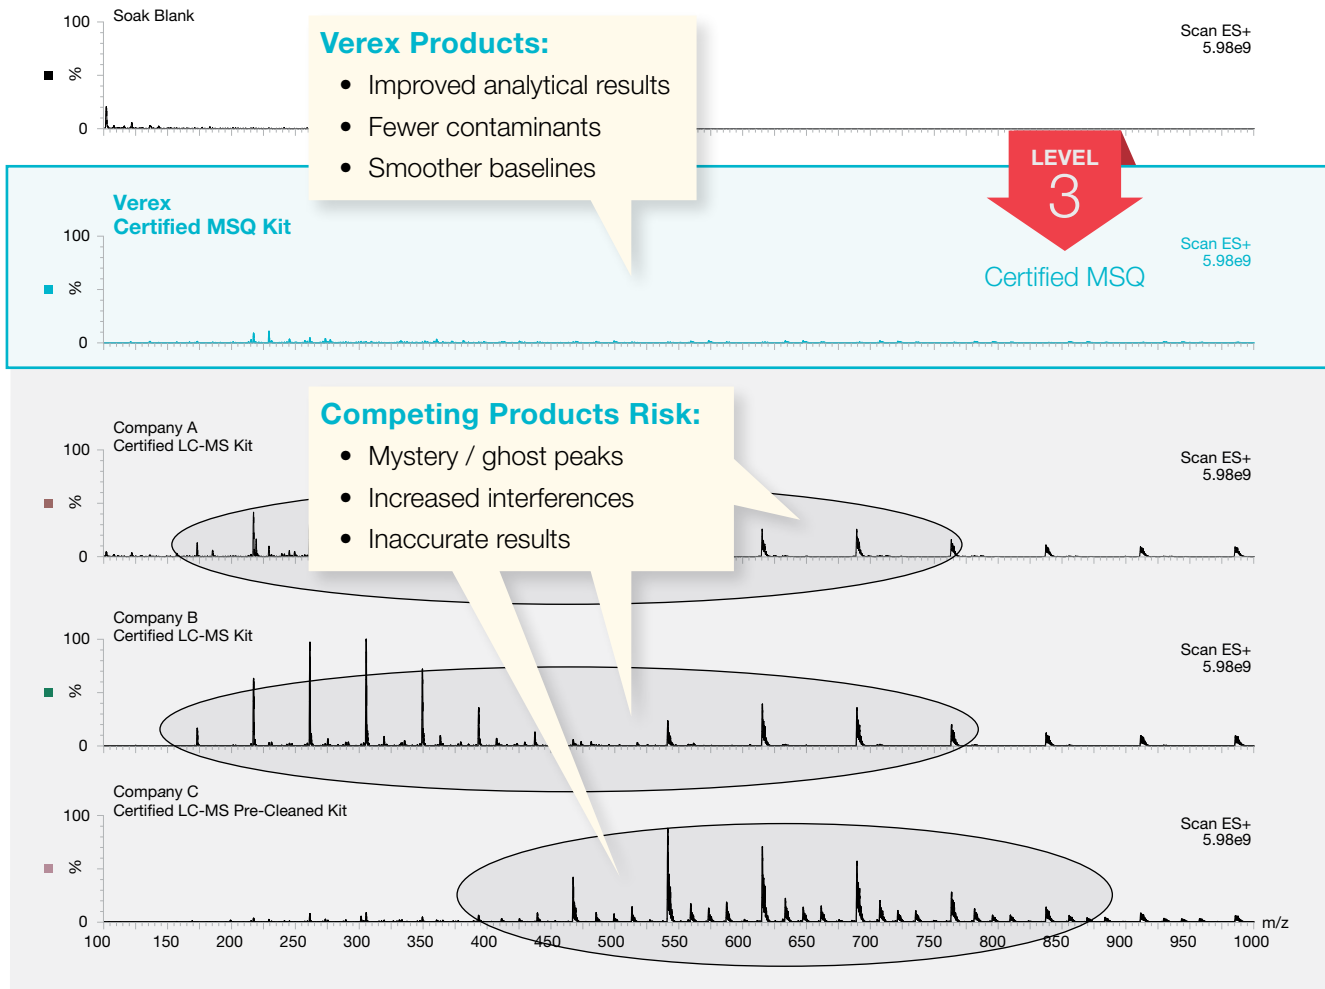

Three Levels of Certification

	 LEVEL 1 Certified	 LEVEL 2 Certified + PLUS (Cert+)	 LEVEL 3 Certified MSQ (Cert + MSQ) (Mass Spec Quality)
Ultra Clean Specially designed and treated for mass spectrometry (MS) applications.			✓
Low Bleed Special cap / closure processing, treating, and testing for low bleed of residual organics. For high sensitivity GC-MS and LC-MS applications.		✓	✓
Dimensionally Verified Machine vision cameras and gauges inspect critical dimensions and tolerances to produce uniform, defect-free products.	✓	✓	✓
Lot Traceable Vial and cap packs are 100 % traceable through the manufacturing process. Certificate of Conformance available by lot number upon request.	✓	✓	✓
Clean Room Packaged Ensures particulate- and contaminate-free products for clean chromatography.	✓	✓	✓
Part Number Extension	No Extension Needed	Certificate of Conformance Included; Extension- C	Certificate of Conformance Included; Extension- M
Part Number Example	AR0-8952-13	AR0-8952-13- C	AR0-8952-13- M

**Need vials for official EPA methods? Try Verex EPA Certified vials – look for part numbers ending with “-E”.
Example: AR0-9531-12-E**

Vials: The Most Critical Part Of Your Analysis!

Though they may look alike, not all vials offer equivalent performance. Variations in product quality can adversely affect your chromatography, leading to mystery peaks, loss of analytes, and irreproducible results. Begin every analysis with high quality Verex™ products to minimize troubleshooting delays and costly, unnecessary rework.

Comparative separations may not be representative of all applications.

Don't take chances with competing vial products. Verex Certified MSQ vials and caps deliver unmatched performance (as seen above in the comparison).
 Other companies' LC-MS certified products can contaminate samples and introduce unidentifiable mystery peaks.

Convenient and Innovative Packaging

Easily bring together all the components needed for proper vial assembly. These complete kits are an easy, affordable way to order matching vials, caps, and septa, guaranteed for a secure, compatible fit.

Convenience Kit Carrier Box

Every kit is designed with a complimentary integrated vial and cap product dispenser.

Two-Compartment Boxes

Single Compartment Box

Our 100/pks for screw, crimp, and snap vials come in these smaller single-compartment boxes, ready for use.

Our two-compartment boxes can neatly hold your vials inside our Convenience Kit Carrier Boxes:

- 1,000 Vial Kits will have 5 sets of two-compartment boxes
- 1,000 Vial + Cap Kits will have 5 sets of two-compartment boxes plus one box of caps

Our 100/pk Vial Kits also come in these two-compartment boxes, with caps on one side and vials in the other (as pictured).

Crimp-Top Vial Products

Crimp-Top Verex™ vials use cost-effective aluminum crimp seals. When properly assembled, this vial-cap combination provides the best seal for long term sample storage, as well as high volatility solvents.

12 x 32 mm, 11 mm Crimp-Top Vials and Closures

Crimp-Top Vials, 2.0 mL

- Cleaner vials eliminate ghost peaks and contaminants
- Used with most autosamplers, including Agilent®, Thermo Scientific®, and Waters®
- Larger-opening “wide-mouth” style prevents broken needles and system downtime
- Precision neck improves crimping

See p. 8 for details.

Snap-Top Vial Products

Snap-top Verex™ vials are the easiest way to produce a secure seal. Snap vials accept either crimp or snap seals. Because the snap-top seal is not as secure as a crimp or screw thread seal, snap vials are only recommended for short term shortage and non-volatile samples.

12 x 32 mm, 11 mm Snap-Top Vials and Kits

Snap-Top Vials and Seals / Closures

- Precision formed for autosampler fit

See p. 34 for our autosampler compatibility chart.

Screw-Top Vial Products

Screw thread Verex vials and caps provide low evaporation and reusability. Because they require no special tools, there are fewer problems with hand injury compared to the manipulation required with crimp seals.

Make the Switch to Verex!

2 Easy Steps:

1. Enter your current vial or cap part number
2. Order the recommended Verex part number

[www.phenomenex.com/
VialFinder](http://www.phenomenex.com/VialFinder)

Protein and Peptide Compatible Vials

Large molecules such as proteins and peptides are easily adsorbed onto even the most inert positively or negatively charged sites on the glass surfaces. Verex plastic vials are inert and free from clarifiers and antioxidants, and are constructed from special 100 % virgin medical-grade polypropylene that does not contribute to adsorption, pH change, or baseline noise.

Type and Description	Finish	Material	Total Volume	Residual Volume	Available as	Page Number	Part Numbers
 Plastic Vial	9-425 Screw Thread	Polypropylene	700 µL	< 5 µL	Kits (certified)	16	ARO-9993-13-C
						16	ARO-9994-13-C
 Plastic Vial	11 mm Snap or 9-425 Screw Thread	Polypropylene	300 µL	< 2 µL	Kits (certified and regular)	17	ARO-9991-13
						17	ARO-9992-13
						16	ARO-9995-13-C

Septa Compatibility

Septa Material	Advantages	Chemical Resistance	Applications	Max. Temp.
PTFE	Economical	Excellent	For single use only	550 °C
PTFE/Silicone	Excellent resealing capabilities	Excellent until punctured; Not suitable for chlorosilanes	Multiple injections then moderate resistance	200 °C
preSlit PTFE/Silicone	Reduces coring; Prevents vacuum from inside of vial	Excellent until punctured then moderate resistance	Multiple injections	200 °C
PTFE/Silicone/PTFE	Resistant to coring; Autoclavable	Excellent	Above average resealing; Multiple injections or applications with long periods between injections	200 °C
PTFE/Red Rubber	Economical	Excellent until punctured	Moderate resealability; Not recommended for holding samples for future analysis	110 °C
Polyethylene	Economical	Good; Not resealable	For single injection use only	175 °C
Polypropylene	Economical	Good; Not resealable	For single injection use only	175 °C
Gray Chlorobutyl	Very economical	Not suitable for chlorinated solvents alkanes, benzenes, or cyclohexanes	Suitable for low pressure applications	120 °C

Specialty Vials

High Recovery CD Vials

- Patented conical interior bottom allows sample contents to completely drain to the center bottom
- Precision microsampling to less than 20 μ L residual volume
- Maximum extraction of vial contents by autosampler, syringe or micropipette
- Manufactured from high-purity USP-grade glass, safeguards against a change in your sample's pH

Max Recovery CD Vials

- Allows MAXIMUM recovery with less than 2 μ L residual volume
- Precision mandrel-formed center-well glass vial
- Bottom thickness of vial is precision-formed at 1.8mm (no damaged needles!)

Plastic Vials

- Ultra-pure plastic (polypropylene) microvials
- Ideal for limited volumes of protein/peptide or pH sensitive samples
- Residual volume as low as 5 μ L
- Conical interior effectively drains to bottom for precision sampling

Insert Vials

- One-piece vial with fused insert, precisely centered and fit
- Evaporation and cross contamination between insert and vial is eliminated with a virtual seal of insert to septa
- Higher sample recovery with either bottom loading or side loading needles
- Residual volume as low as 4 μ L

Micro Vials with Tapered Base

- Precision-made microsampling glass vials with tapered base
- Unique draining design facilitates high sample recovery
- Residual volume as low as 4 μ L
- Available in clear or amber (for light-sensitive applications)

Autosampler Compatibility Chart

Verex vials that are compatible with various models of autosamplers as indicated in the table. Certain autosamplers require the purchase of optional vial trays and, in few a cases, programming upgrades to use all of the vials listed. A • mark indicates that the vials from this category are compatible with the autosampler in most configurations.

QUALITY

We're committed to the highest quality standards. Verex vial products are governed by our ISO 9001:2015 quality management system to ensure that every vial meets certification specifications.

INNOVATION

Verex vial products are engineered to exact specifications because uniform high-purity vials are essential to accurate, reproducible chromatographic results.

SUPPORT

Each customer receives expert separation advice from initial sample preparation through chromatographic analysis. Utilize our friendly technical consultants to select the most appropriate Verex vial product for your sample and to support your analytical method.
